
Instructions Steamer Basket

STEAMER WITH BASKET – PROPANE

BEFORE USE:

- The unit must be as level as possible.
- Fill steamer to water line.
- Water line is visible inside and out on each side.

LIGHTING INSTRUCTIONS:

- 1] Hook gas line to tank (be sure it's tight) and turn on.
- 2] With a long lighter or long match light and place in circular metal sleeve on the back of the unit.
- 3] Turn valve on regulator to let gas flow to burner and ignite.
- 4] Turn valve to desired flame height.
(steam will begin in 20 minutes)

INFORMATION:

- When in use it takes 20 minutes to come to a boil (steam).
- Be careful opening the lid as the steam is **VERY HOT**.

DURING USE:

- Be sure the water level is maintained during use.

AFTER USE:

- After all valves are turned off tank, hose, regulator wait until the water cools and drain (using drain valve provided). Unscrew hose from tank.
-
